

GBMC AUTUMN 2021 NEWSLETTER

THE ITER PROJECT

Having gone through ups and downs now ITER is considered an answer to resolve the energy needs of the world. Clearly not a cheap endeavour but like every technology it will eventually become accessible.

To learn more about this green energy visit:
<https://www.iter.org/>

ITER organizes regularly virtual visits – check their website for more information

WHAT DO OUR CONSULTANTS SAY ABOUT THE NEW PMP EXAMINATION?

It is testing candidates on a narrower focus than past PMP exams. The focus is clearly agile.

No more theoretical questions – the exam is 100% situational. You are given a situation and you have to choose the correct action to take based on choices given.

With a good training course you will be able to take the exam and succeed.

Beware of trainings where the trainer just reads the slides – you will not learn much.

It is a long exam – be prepared to sit 4 hours.

WHAT DO OUR CONSULTANTS SAY ABOUT THE PROJECT MANAGEMENT PRACTICES?

Even today, companies struggle in implementing successfully a project management method in their organizations

Organizational Structures are one cause for poor implementation

Worse than structures are organizational cultures that resist change – “I don’t see the problem and neither want to see it”

Dedicated consultancies that support your journey without a time clock in one hand are rare to come by.

If companies do not know what they are aspiring to will be taken for a ride by consultants.

If you have questions on any of the above write to me:
